

SENIOR HEALTH CARE SOLUTIONS ANNOUNCES NEWEST PROJECT

Senior Health Care Solutions, the area's premier provider of long-term care services, is excited to announce their newest upcoming development project. Senior Living at the Highlands, is slated to begin construction in the spring of '26. The project development will include a 60-bed skilled nursing and rehabilitation center and a 50-unit assisted living center. Located in the popular Highlands development in Archbald, the facilities will front the expansive development of homes and townhomes created by Powell Development and become part of a growing Continuing Care Retirement Community. The Powell Development is comprised of over 200-homes and townhouses (and still growing) and boasts numerous amenities including an 18-hole senior golf course, community center, full-service gymnasium and spa, swimming pool, 2-restaurants and retail space including numerous health care professionals of all disciplines.

The skilled nursing center will be named the "Ellen Craven Memorial Health Care Center" in honor of Ellen Craven who passed away this year and who dedicated her life to the long-term care industry in Lackawanna County. The assisted living center will be called the Highlands Assisted Living residence. Both buildings will offer numerous amenities and present as a fine hotel providing the best in both skilled nursing and assisted living services. Staffed by a full array of licensed professionals, the two operations will work together to allow our residents to "age-in-place" and provide numerous services to the residents of the development.
